DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 4, 16, 18, 19, 28-33, 36, and 37 are rejected under 35 U.S.C. 102(e) as being anticipated by Reinke #6,240,582. Reinke discloses a table top device comprising a frame (generally at 20) connected to a central section (generally shown at 50); wherein the frame extends longitudinally; and a support system (38, 40, 42, 44, 46).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 5, 10-14, and 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reinke in view of Korver, II #5,537,454. Reinke discloses the claimed invention except for the mesh member and the carbon fiber material. Korver, II teaches that it is known to provide mesh members and carbon fiber material as set forth at column 2, lines 29-63. It would have been obvious to one having ordinary skill in the

art at the time the invention was made to carbon fiber material and mesh, as taught by Korver, II in order to facilitate taking x-ray images.

Response to Arguments

5. Applicant's arguments with respect to claims 1-5, 10-14, 18, 19, 22-25, 28-33, and 36-37 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
